**CANOPY** Product Information Guide for Authorized Dealers

**CANOPY**

Door CANOPY Series

PALRAM INDUSTRIES is a global manufacturer of thermoplastic products for industry, construction, architecture, advertising, and agriculture. The company has manufacturing facilities in Israel, England, China, and the USA. Over the course of more than 40 years, PALRAM has been a leader in many product categories, including Polycarbonate, PVC & Acrylic sheets covering for Do-It-Yourself and commercial uses. For further corporate information about PALRAM, it's history, and it's vision, please visit: [www.palram.com](http://www.palram.com)

PALRAM's ongoing investment in state-of-the-art plants, machinery and technology, combined with in-house process and product innovations, has created a culture of continual product and plant development.

As PALRAM has grown larger, it has still retained its ability to respond to the demands and tailor-made requirements of its worldwide customers.

In 2005, PALRAM established PALRAM APPLICATIONS LTD to engage the development, production and distribution of innovative products and to centralize PALRAM's activity in the fields of commodities and finished products in order to achieve continued growth and to increase the awareness of the PALRAM brand.

In 2006, PALRAM APPLICATIONS introduced its first line of "Canopy & Awning" kits to the European market, the USA, and Canada. PALRAM APPLICATIONS has established a position of strength by marketing it's own products through various channels under several brands. PALRAM APPLICATIONS has also worked with partners to gain market share.

The highly successful Canopy & Awning series is marketed under the PALRAM OUTDOOR Products brand and projects the company's vision of the "Total Design Concept" – complete, self installed applications for the multiple covering needs in the home and commercial facilities.

PALRAM's Canopy system is unique in its ingenuity and simplicity of assembly.

The Canopy system combines high-tech materials with steel Metals and anodised Aluminum profiles with advanced laser cut technique to maintain high performance and stylish design in addition to the highly impact-resistant Polycarbonate PVC and Acrylic cover. The Canopy is marketed in compact packaging and at very competitive prices in order to be accessible to the end user worldwide.

The new environmental studies shows that windows and doors shaded by awnings in residential homes is a viable means of reducing energy and air conditioner usage and provides significant savings on cooling costs and on peak electrical demand.

Please continue and see the products that we believe will successfully match your requirements.

**Model: GEMINI 1350**

**Assembled dimensions:**

Metric - 1350mm L x 918mm W x 160mm H

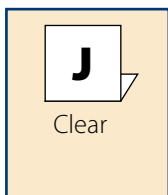

Imperial - 53.14" L x 36.14" W x 6.3" H

**Manufacture:** Palram Applications

**Product line:** Door CANOPY Series
