General Overview

PALRAM is global manufacturer of thermoplastic products for industry, architecture, advertising, and agriculture. The company has manufacturing facilities in Israel, England, China, and the USA. Over the course of more than 40 years, PALRAM has been a leader in many product categories, including polycarbonate and PVC covering for Do-It-Yourself and Commercial Greenhouse Growers. For detailed corporate information about PALRAM, it's history, and it's vision, visit www.palram.com.

In 2002, PALRAM introduced it's first ever-line of hobby greenhouse kits to the European market, the USA, and Canada. PALRAM has established a position of strength by marketing it's own products through various channels under several brands. PALRAM has also worked with partners to attain market share. In 2006, PALRAM re-organized it's manufacturing, marketing, brand, and sales strategy in order to achieve continued growth and to create greater awareness of the PALRAM brand.

Now, you and your business have an opportunity to join PALRAM as it continues to build it's leadership position in Personal Greenhouses market with the introduction of the "PALRAM HOME & GARDEN PRODUCTS" brand.

There are two objectives for establishing this brand: build awareness of the PALRAM name; and build a foundation for a line of products that span across the entire HOME & GARDEN market segment.

SILVER LINE

SERIES GREENHOUSES

The highly successful SILVER LINE series greenhouse will be marketed under the PALRAM HOME & GARDEN Products brand. PALRAM's SILVER LINE products maintain the elegant, traditional designs found throughout Europe, but improves performance with highly impact-resistant polycarbonate glazing, compact packaging, and very competitive pricing. To complement the SILVER LINE, PALRAM recently introduced the 4'x2' LEAN-TO, and a 3'x3' COLD FRAME, both of which are covered with PALRAM's own high quality polycarbonate. Please continue and see the products that we believe you'll be most successful with and why.
